

## Sex Trends in High School Teenagers.

### New England Primer Web Site

Abstinence Sex Ed Lesson #1: <http://neprimer.com/sex-ed.htm>

CDC Abstinence Sex Data: <http://neprimer.com/sex-ed2.htm>

*For out of the heart proceed evil thoughts, murders, adulteries, fornications, thefts, false witness, blasphemies: [ Mat 15:19 KJV ]*

This page was developed from the data in **Table 30** of this **CDC Report<sup>1</sup>**. The Table covers data for the four years from 1996 through 1999. From the many recorded behaviors of youth in this report we choose the "Sexual Trends" because these are a matter of the heart and spirit of youth, i.e. "issues of life"<sup>2</sup>; whereas, the smoking, alcohol, drugs, and suicide are typically bad adult behaviors that are acquired in an attempt to deal with some of the depressing experiences of the heart and spirit. We defend the position that when "sin" is confronted, disciplined, and resolved with forgiveness and or justice to the extent possible then the victims can recover, be healed and continue on with a productive life, free of the typical bad adult behaviors.

This information was assembled to show the cause and effect for the demonstrated behaviors and the failures of the **condom based, prostitution condoned sex education.**

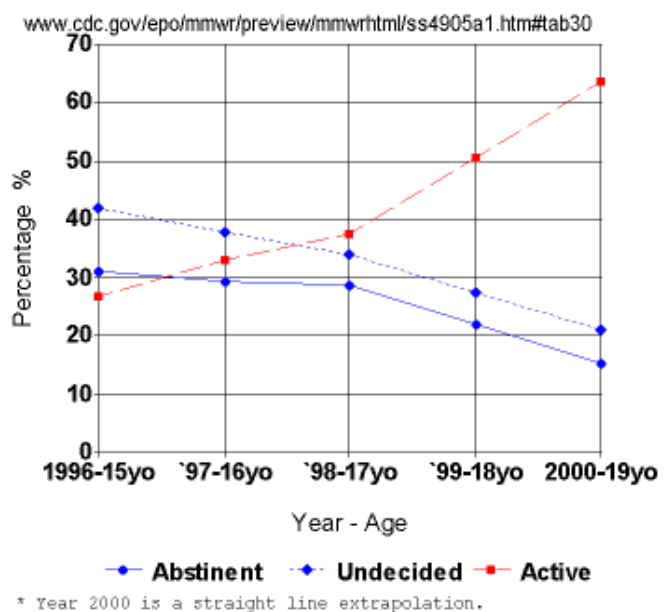

Parents who are concerned about these trends should contact **RSVP America<sup>3</sup>** and get their **"Parents Curriculum Analysis Instrument"** that is a methodical process of determining the level of Kinsey's abnormal, psychopathic sexual orientation and influence in their child's sex education materials.

The red line is the self inflicted, self victimized behavior that leads to AIDS, STD's, alcohol and drugs, pregnancies, abortions and suicides. Let's help these children with a little wisdom. This red line needs to come down and the blue lines need to reach above 40% each. This would be in keeping with the trends prior to Everson v Board of Education 1947 and the fraudulent science of Alfred Kinsey and his sex reports of the 1950's.

Parents need to determine the level of abstinence sex ed taught in the local public schools. The answers provided by the **"Parents Curriculum Analysis Instrument"<sup>3</sup>** will be more informative than from the school board or sex ed teacher because all sex ed classes will have the word "abstinence" in it. So if you ask the school board about it they will say yes they have "abstinence" sex ed; however, the level of commitment to it will be determined by the behavior of the children.

**We need to encourage the "Undecided" to stay with abstinence and reinforce the "Abstinent" to persevere.**

### SEX TRENDS IN HIGH SCHOOL

The first thing to note about this graph<sup>1</sup> is that these behaviors are a result of a thought process and teaching methodology.

**Solution 1:** Religion classes need to be returned to public schools. **Serious & IMMEDIATE consideration should be given to a Constitutional Amendment which provides for the Bible Curriculum, Bible reading and prayers to be mandated in all public schools.** Life is too short & the consequences of trial & error ( HIV/AIDs) too deadly to prohibit teaching the Bible. In the mean time home school your child in "**The New England Primer, 1996**" which is available online by an Email Order Form: <http://neprimer.com/emof/nep-emof.htm>

**Solution 2:** 'Condoms' & 'Sex Orientation' need to be expelled and Abstinence returned and emphasized until the **Unmarried Pregnancy Rate<sup>5</sup>** returns to 12% or less.

See also <http://neprimer.com/sex-ed-popup.htm> How "**Parents can easily influence their teenagers (to be twelve-and-a-half times more likely to remain virgins.**"
